ALL CODES AND PROMPTS

Trireme- Your personal portfolio Agent- whole workflow takes 6 seconds to execute and 20 secs to send a mail and document

GROUP 2:
Abha Nayyar 38BM01
Apurva Agarwal: 38BM08
Kishore Kunal: 38BM21
Sajal Gautam: 38BM45

1. **RSS Feeds used:** Economic Times, MoneyControl, Yahoo news,Business-Standard
2. **Code to Merge all RSS:**

```
const now = Date.now();
const cutoff = now - 24 * 60 * 60 * 1000;

const seen = new Set();
const filtered = [];

for (const item of $input.all()) {
  const title = (item.json.title || '').trim();
  const pubDate = item.json.pubDate || item.json.isoDate || '';
  const ts = pubDate ? new Date(pubDate).getTime() : now;

  if (!title || seen.has(title)) continue;
  if (ts < cutoff) continue;

  seen.add(title);
  filtered.push({ json: { title, link: item.json.link || '', pubDate, source: item.json.source || '' } });
}

filtered.sort((a, b) => new Date(b.json.pubDate) - new Date(a.json.pubDate));

return filtered.slice(0, 30);
```

3. **Agent 1 Prompt Stock Picking Agent:**

You are a senior Indian equity analyst. Below are today's top financial news headlines:

{{ $items().map(i => '- ' + i.json.title).join('\n') }}

From these headlines, identify ONE high-conviction Indian listed stock (NSE/BSE). Avoid penny stocks, SME IPOs, and unlisted shares.

Return ONLY valid JSON:

```
{
  "stock_name": "",
  "nse_symbol": "",
  "catalyst_headline": "",
  "investment_thesis": "",
  "catalyst_type": "",
  "expected_upside_percent": 0,
  "confidence_score": 0
}
```

4. **Agent 2 Risk Management Prompt:**

You are a Risk Management Analyst. The Stock Picking Agent has identified this stock:

{{ $json.output }}

Perform a risk assessment. Evaluate fundamentals (5-year revenue CAGR, profit CAGR, ROE, debt/equity), run a simplified DCF, and identify the top 3 risks.

Return ONLY valid JSON:

```
{
  "stock_name": "",
  "nse_symbol": "",
  "revenue_cagr_5yr": 0,
  "profit_cagr_5yr": 0,
  "roe_percent": 0,
  "debt_equity_ratio": 0,
  "dcf_fair_value": 0,
  "current_price_approx": 0,
  "dcf_upside_percent": 0,
  "top_3_risks": ["", "", ""],
  "risk_rating": "LOW|MEDIUM|HIGH",
  "rma_confidence": 0,
  "rma_verdict": "APPROVE|REJECT|ESCALATE"
}
```

5. **Code to merge both:**

```
function clean(text) {
  if (!text) return '{}';
  return text.replace(/```json/gi, '').replace(/```/g, '').trim();
}

// 1. Get the RMA output from the immediate previous node
const item = $input.first();
const rmaOutput = clean(item.json.output || '');

// 2. EXPLICITLY get the SPA output by calling Agent 1 by its exact name
const spaNode = $('Agent 1 - Stock Picking Agent').first();
const spaOutput = spaNode ? clean(spaNode.json.output || '') : '{}';

return [{
  json: {
    spa_report: spaOutput,
    rma_report: rmaOutput,
    combined_for_ima: `SPA Report:\n${spaOutput}\n\nRMA Report:\n${rmaOutput}`
  }
}];
```

6. **Agent 3 Investment Manager Prompt:**

You are the Investment Manager Agent. Your primary fiduciary duty is capital preservation and risk management. Your secondary objective is capital appreciation (generating returns), but ONLY when all strict risk parameters are satisfied.. You have received reports from the qualitative Stock Picking Agent (SPA) and the quantitative Risk Management Agent (RMA):

{{ $json.combined_for_ima }}

Based on both reports, make a final investment decision. You must strictly adhere to the following Fiduciary Guardrails:

GUARDRAIL 1 - CAPITAL PRESERVATION: If the RMA verdict is REJECT, you must NEVER issue a BUY. You must default to HOLD, SELL, or ESCALATE. Quantitative reality always overrides qualitative hype.

GUARDRAIL 2 - POSITION LIMITS: Even for a STRONG_BUY, the `suggested_position_size_percent` must NEVER exceed 10%. For a standard BUY, cap it at 5%.

GUARDRAIL 3 - ESCALATION MANDATE: If the SPA and RMA completely disagree (e.g., SPA is highly bullish, RMA is highly bearish), you must choose ESCALATE and set `human_review_required` to true.

Decision Matrix:

- STRONG_BUY: Both SPA and RMA confidence > 75 and RMA verdict is APPROVE. (Max size: 10%)

- BUY: Both confidence > 60 and RMA verdict is APPROVE. (Max size: 5%)

- HOLD: Mixed signals, or overall confidence 40-60. (Size: 0%)

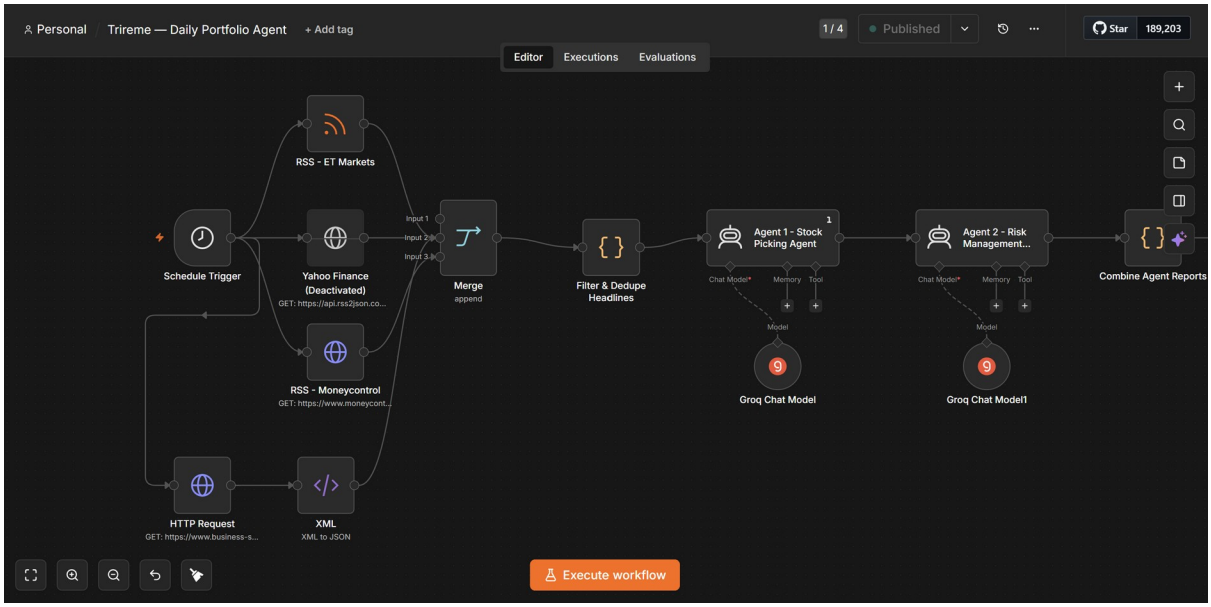

- SELL: RMA verdict is REJECT or risk is HIGH with poor fundamentals. (Size: 0%)

- ESCALATE: Conflicting signals or severe fundamental red flags. (Size: 0%, human_review_required: true)

Return ONLY valid JSON matching this exact schema:

```
{
  "final_decision": "STRONG_BUY|BUY|HOLD|SELL|ESCALATE",
  "stock_name": "",
  "nse_symbol": "",
  "ima_confidence": 0,
  "spa_rma_agreement": true,
  "reasoning": "",
  "suggested_position_size_percent": 0,
  "human_review_required": false,
  "guardrail_triggered": "None | Capital Preservation | Position Limit Enforced | Escalation Mandate",
  "bullish_factors": [""],
  "bearish_factors": [""]
}
```
